Important Safety Notice: **Keep meters and vents clear**

During the winter months, it's important to keep your gas meter clear of snow and ice so it will operate properly. If snow does build up around your gas meter, use care when clearing it. Use a broom or your car's snow brush to prevent damage to the meter.

If you have a gas boiler, furnace or water heater that vents through the side of your home or business, be sure to keep snow away from those vents. Neglecting to do so could cause the airflow to be blocked and could result in dangerous gas feeding back into the building.
