Get the most from your natural gas

Clean burning natural gas is less expensive than other fuels and it never runs out. Why not expand natural gas use in your home?

**HEAT:** If you already have natural gas for cooking, or another use, you most likely already have the pipes needed to use natural gas to heat your home.

**WATER HEATING:** There are combination space/water heating units as well as stand alone water heaters that work with natural gas.

**COOKING:** Most cooks prefer a gas stove over electric. Gas stoves heat up faster, respond to temperature changes faster and are easier to control.

**BACKYARD BARBECUE:** Imagine never having to fill a propane tank again. Grill all summer long using natural gas.

**FIREPLACE:** Just flip a switch and enjoy a warm, inviting fire.

**CLOTHES DRYER:** An electric dryer is one of the most power hungry appliances in your home. Replace it with a gas model to save energy.

**POOL HEATER, PATIO HEATER, BACKUP POWER GENERATOR** and the list goes on. Before adding a new natural gas burning device, give us a call to ensure your meter is sized properly.
About Your Pipes

Warning: CSST

Corrugated stainless steel tubing (CSST) is a thin-walled metallic gas piping product that can be used as an alternative to conventional gas piping material. This flexible piping is commonly coated in a yellow plastic. If your home uses CSST, we recommend that it is inspected by a qualified plumber for proper installation and bonding. CSST that is not properly bonded could cause an accidental leak or fire when struck by lightning.

Customer Owned Gas Lines

Liberty Utilities diligently maintains the pipes that bring gas to your home or business. However, it’s important to know that the pipes that extend from the outlet of the gas meter to natural gas-burning appliances are the responsibility of the customer. These pipes should be inspected regularly. Contact your local plumbing/heating contractor to have your gas lines checked. If corrosion or other unsafe conditions are found, the pipes should be repaired immediately. A fee for this service will be charged by the contractor.

Your Bill Explained

Distribution Chg

The main charges on your bill are related to Distribution and Gas Supply. Liberty is a distribution company. Our business is delivering natural gas to homes and businesses using our underground pipeline system. Our cost of doing business is reflected in the Distribution Charges on your bill.

Gas Supply Chg

The gas that we deliver is purchased on the energy market and delivered to the area via high pressure underground pipelines. The cost to purchase and bring the gas to our distribution system is reflected in the Gas Supply charge on your bill. We don’t profit from this charge. We pass our costs on to customers without marking up the price.
