- Rebate must be postmarked or submitted online no later than **January 31, 2017**

ROOM AIR PURIFIER BEST PRACTICES

• Look for ENERGY STAR

In addition to reducing greenhouse gas emissions, choosing an ENERGY STAR certified room air purifier over a standard model can save you \$200 in energy costs over the life of the product.

• Check your room size

Be sure to consider the square footage of the room where you will place the room air purifier. Larger models use more energy, so choose a model that is sized appropriately to fit your room.

• Consider placement

While many room air purifiers are designed to sit on the floor, tabletop models and wall-mounting designs are also available. Regardless of configuration, it is important to read the accompanying product manual for instructions on where to place your room air purifier to achieve optimum performance.

• Understand Clean Air Delivery Rates

Clean Air Delivery Rate (CADR) measures how quickly a unit delivers filtered air and can be used to measure the performance of a room air purifier. The higher the CADR, the more quickly the room air purifier filters the air.

www.NHSaves.com**

Congratulations on your decision to buy an ENERGY STAR Certified Room Air Purifier!

The ENERGY STAR certified room air purifier must be installed in a participating utility's service area. The utilities reserve the right to conduct field inspections to verify installations. Limitation of liability: Your participating utility does not warrant the performance of installed equipment expressly or implicitly. For more information, call 1-877-366-3749.
