

Save Energy. Save Money. Save the Interest.

No-interest financing is available for Liberty Utilities business customers.

Do you want to make facilities improvements that will save you energy and money? Do you have projects in mind, but need to avoid large outlays of cash, and high-interest costs? Liberty Utilities' 0% Financing Program helps customers pay for eligible energy-efficient projects (after incentives) with 0%-interest loans that are repaid in fixed monthly installments through their monthly Liberty Utilities electric bills.

What kinds of projects are eligible?

Financing is available to fund many technologies, including lighting, HVAC, and variable frequency drives. The project must qualify for a rebate or incentive through a Liberty Utilities program. You may install the equipment yourself or hire a contractor to perform the work. Liberty Utilities will need to inspect the site before you remove old equipment, and will perform another inspection upon project completion.

How much can my business borrow?

Business customers may qualify for loans up to \$50,000 per project with a \$150,000 maximum per year. Loan funds must be used to purchase and install qualifying energy-efficient equipment.

Example

Cost of recommended energy efficiency improvements	\$20,000.00
Liberty Utilities incentive (up to 35% of project cost; subject to budget availability and other caps)	\$7,000.00
Customer contribution	\$13,000.00
Monthly payment added to electric bill (from 1-120 months)	\$216.66

How do I learn more?

Contact us at NHsaves@libertyutilities.com

The Program is funded by electric ratepayers and is operated according to state laws and under the regulations of the New Hampshire Department of Public Utilities and the New Hampshire Department of Energy Resources. Customer must not have received a disconnect notice in the past 12 months. Some restrictions apply; program is subject to change or cancellation without notice.
