

System Benefits Charge

The System Benefits Charge on your electric bill is used to collect funds for statewide Energy Efficiency Programs and to help income-qualified households pay their bill. All electricity customers in NH pay this charge.

The funding for energy efficiency goes towards rebates and incentives we provide to customers for qualifying high efficiency measures installed in homes, businesses, or municipalities.

Assistance funds go to customers who meet certain income criteria as determined by their local community action agency.

For more information on these programs, please visit www.libertyenergyandwater.com.

Dig safe this spring

April is National Safe Digging Month, making it the perfect reminder that every outdoor project should start with safety.

Liberty is committed to providing safe and reliable electric service to our customers. As an electric utility, we deliver power to homes and businesses through an extensive network of overhead and underground electric lines. Our crews regularly inspect, maintain, and upgrade this infrastructure to deliver dependable service to the communities we serve.

Even routine digging can pose serious risks if underground electric lines are damaged. Striking buried electrical facilities can cause power outages, serious injuries, or even loss of life. It can also lead to costly repairs, service disruptions, and potential fines. Before starting any digging project, no matter how small, it's important to take the proper steps to identify and avoid underground utilities.

The good news? Putting safety first is simple.

One free, easy call gets utility lines marked and helps protect you and others from injury and expense. **Before starting any digging project, know what's below by calling 811 or visiting www.call811.com.**

It's convenient, it's easy, and it's the law.
