

## Take Control of Your Bills

We want to help you save. A few small steps could add up to big savings.

**Weatherize your home** - Sealing air leaks around windows, doors, and vents will help save energy and will make your home more comfortable.

**Smart controllers** - Smart thermostats, smart appliances, and smart irrigation controllers all use technology to help you save.

**Look for EPA labels** - When buying appliances, water heaters, electronics, light bulbs, toilets, faucets, shower heads, and more, look for ENERGY STAR® and WaterSense labels. These products are certified by the EPA to use less and can save you money on your utility bills.

## Add Electricity to Your Cart

Did you know that you have a choice in who supplies the electricity that we deliver to you? We encourage you to consider all available energy supply options to determine which one will best meet your needs. You can use Energy Service that Liberty purchases, or you can purchase from a third party, known as an energy marketer or energy supplier.

If you do switch to another supplier, Liberty will continue to deliver your electricity, respond to service and emergency needs, and provide storm restoration services.

For more information, visit [www.puc.nh.gov/Consumer/consumer.htm](http://www.puc.nh.gov/Consumer/consumer.htm).

## Sustainability

### Regional Greenhouse Gas Initiative

The Regional Greenhouse Gas Initiative (RGGI) is the first mandatory, market-based CO<sub>2</sub> emissions reduction program in the United States. Carbon allowances are auctioned periodically, and the revenue we receive goes back to our customers in the form of a credit under transmission rates. **For the 2024-2025 period, which runs from May 1, 2024 - April 30, 2025, we will be giving \$3,386,107 back to our electric customers.** This money is distributed on a per kWh basis. Please visit [www.rggi.org](http://www.rggi.org) to learn more.
