

Take Control of Your Bills

We want to help you save. A few small steps could add up to big savings.

Weatherize your home – Sealing air leaks around windows, doors, and vents will help save energy and will make your home more comfortable.

Smart controllers – Smart thermostats, smart appliances, and smart irrigation controllers all use technology to help you save.

Look for EPA labels – When buying appliances, water heaters, electronics, light bulbs, toilets, faucets, shower heads, and more, look for ENERGY STAR® and WaterSense labels. These products are certified by the EPA to use less and can save you money on your utility bills.

Weatherization Warriors

Make your home more efficient by signing up for our Home Energy Performance program.

An audit will evaluate your home's energy usage and provide recommendations on ways you can improve efficiency and save money. If you decide to move forward with recommendations from the energy audit, you are eligible to receive **substantial rebates**, as well as **0% financing** to cover the remainder of improvements made. You may also qualify for **two smart thermostats!**

To learn more about the rebates available and the 0% interest financing offered, please scan the QR code below or visit the "Smart Energy Use" section of www.libertyenergyandwater.com.

Energy Efficiency Adds Curb Appeal

Your main goal in improving the energy efficiency of your home is to save money. But did you know you can reduce energy bills **and** give your home a little extra curb appeal?

- Remove cracked/peeling caulking around exterior windows and apply new caulk.
- Replace unsightly, saggy weatherstripping on exterior doors to create a fresh look and reduce conditioned air from escaping.
- Outdoor lighting is for safety and security, but it can also show off your property at night. LED lighting is not only highly efficient, but the high-quality light will really make your home shine.

Safety

Stainless Steel Piping

Corrugated Stainless Steel Tubing (CSST) is a flexible, stainless steel pipe used to supply natural gas and propane in residential, commercial and industrial structures. Coated with a yellow or, in some cases, a black exterior plastic coating, CSST is usually routed beneath, through, and alongside floor joists in your basement, inside interior wall cavities, and on top of ceiling joists in attic spaces.

While this type of pipe is safe, it is strongly recommended that you determine if the CSST system is properly bonded and grounded.

If you are unsure as to whether your property has CSST or whether it has been properly bonded and grounded, contact a licensed electrician to arrange for a professional inspection.

Visit www.libertyenergyandwater.com for more information about CSST piping.

Gas Theft

Stealing natural gas is a dangerous act which puts everyone at risk. Tampering with or bypassing a natural gas meter in order to obtain free natural gas is illegal and can be harmful to the perpetrator as well as to others.

If you suspect anyone has tampered with your natural gas meter, please contact us at 1-855-327-7758.

Rates

Summer Rates Start May 1

Our summer rate period for Gas Supply begins on May 1 and continues until October 31. The Gas Supply charge on your bill represents what we pay for the gas that we deliver to our customers. The price, based on projected demand and market conditions is calculated, then reviewed by the New Hampshire Public Utilities Commission. The price that we pay for gas is passed along to customers without a markup. Liberty does not profit from this charge. To view the current Gas Supply rate and a summary of all the rates on your bill, please visit the "Rates" section of www.libertyenergyandwater.com.
