

Important Message for our Customers Regarding Natural Gas Rates

On April 28, 2017, Liberty Utilities (EnergyNorth Natural Gas) Corp. submitted a rate filing with the New Hampshire Public Utilities Commission (“PUC”) to increase base rates, which recover the cost of the distribution system used to deliver gas to customers.

Liberty proposes a two-step increase to annual distribution revenue and rates. The first, a \$7.8 million increase in revenue, is proposed to take effect July 1, 2017. The second, an annual revenue increase of \$12.0 million, is proposed to take effect following a final decision by the PUC, but no earlier than January 1, 2018. For the proposed July 1, 2017, rate increase, the monthly total bill impact for a residential heating customer using 63 therms per month is approximately \$5.08 (6.92%) as compared to the rates in effect today. The monthly total bill impact for both rate increases for a residential heating customer using 63 therms per month is approximately \$14.15 (19.29%) as compared to the rates in effect today. Bill impacts for commercial and industrial customers will vary.

For information regarding the specific rates proposed for each class of service, go to www.libertyutilities.com. Additional information is available on the PUC’s website in the virtual file for the rate case, which the PUC docketed as DE 17-048, <http://www.puc.nh.gov/Regulatory/Docketbk/2017/17-048.html>.
