

## April is National Safe Digging Month

Whether it's a big project like adding a swimming pool or just planting some new shrubs around your yard, make sure you **call 8-1-1 before you grab the shovel!** Your property may contain underground utility lines. Knowing where utility lines are buried can help you avoid injury, service outages (and unhappy neighbors), and costly repairs.

Call 811 at least 72 hours before you start digging (excluding weekends and holidays) and you'll be routed to your local 811 call center. Tell the operator where you'll be digging, what type of work you're doing, and when. Within just a few days, local utility companies will visit your site and mark the location of any underground lines, free of charge. Each utility type is marked with a specific color:

**Red** - electric  
**Yellow** - natural gas  
**Orange** - telecommunications  
**Blue** - water  
**Green** - sewage

April was designated as National Safe Digging Month by Common Ground Alliance to highlight the importance of calling 811 before you dig, and April (which is the start of spring and known for planting and working around the house), is the perfect time to promote it.

Visit [www.call811.com](http://www.call811.com) or call 811 to get started with a location request. **Safety is in your hands.**

## Preventing Accidental Fires

Protect your family and home from accidental fires by keeping all flammable materials away from natural gas appliances. Never use or store flammable materials where a spark or open flame could ignite them. Flammable items include:

- Gasoline
- Propane tanks
- Lighter fluid
- Solvents
- Acetone
- Adhesives
- Camp stove fuel
- Paints and thinners

When working with these materials, make sure you are in an open, well-ventilated space. Store all flammable products in approved, nonbreakable containers that are tightly closed. Use them away from any natural gas appliances or other potential sources of fire.

## Construction Season is Here

Every year, we invest money in replacing parts of our distribution system to provide continuous improvements and keep the natural gas delivery system safe and reliable. Because the majority of our infrastructure is found underground, customers and other residents/businesses in the area could be affected by construction-related traffic delays.

As part of the construction process, customer action may be required. If this is the case, you will receive a letter, door hanger, or be approached by a Liberty crew member with proper identification to determine a time that an interruption in service may be appropriate.

For more information about our scheduled work, visit [www.libertyenergyandwater.com](http://www.libertyenergyandwater.com) or scan the QR code.
