

Energy Service Price History: Small Businesses and Residential Customers Energy Service is provided to customers who have not chosen an alternate energy supplier. Energy Service ensures that no one will be without a supplier of electricity. To provide Energy Service, we solicit bids from electricity suppliers and then enter into a contract to purchase electricity from one or more of these suppliers. We do not profit from any increase or decrease in the price of Energy Service, but merely pass the costs of the supply on to you.
